Social Report

2022-2023

**Empowering Latin American Talent to Shape the
Future of Technology on a Global Scale**

Dear Members and Supporters,

It is with great pride and enthusiasm that I present Fundación del Saber's Annual Report for fiscal year 2022-2023. This report encapsulates our journey, milestones achieved, and the unwavering dedication of our community. Over the past year, we have strengthened our presence across Latin America, fostering an environment of growth and innovation. Our commitment to advancing education and professional development in the tech industry remains steadfast.

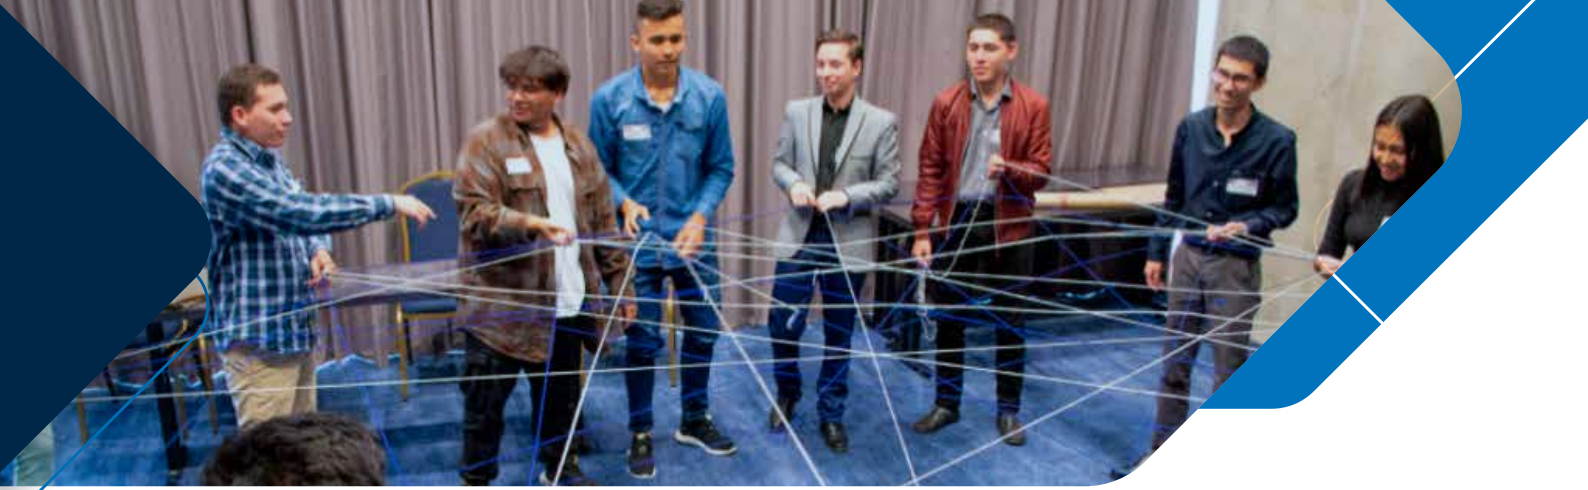

Our efforts have been fueled by the passion and support of our members, industry partners, and sponsors, all of whom share our vision of empowering the tech community. As we reflect on our progress, we also look forward to the future, with ambitious goals to expand our reach and impact even further.

Thank you for your continued trust and support.

Sincerely,

Rupay Fernandez
President, Fundación del Saber

At Fundación del Saber, we are dedicated to technological advancement in Latin America.

Our primary goal is to support and empower the region's talent through training programs, while fostering a collaborative community.

By bringing together students, professionals, universities, and industry companies, we aim to promote sustainable and equitable technological development in the region.

Our Commitment

At Fundación del Saber, we envision a Latin America where innovation and technological development drive well-being and prosperity, and where every young person has access to the tools and opportunities needed to reach their full potential.

Our mission is to strengthen the engineering community in Latin America through strategic partnerships that facilitate education, training, and mentorship in new technologies, enhancing the quality and impact of professionals in the region.

Expansion and Growth

Fundación del Saber has experienced significant growth in recent years. We expanded our presence to 5 countries in Latin America: Brazil, Colombia, Mexico, Argentina, and Bolivia, demonstrating our commitment to reaching more communities and fostering technological advancement throughout the region. Our ongoing efforts aim to extend our reach to more countries in the region for the coming years.

5
Countries

Our membership has grown steadily, reflecting our progressive influence and the value we provide to the tech community. This expansion enables us to support a broader network of students, professionals, and industry organizations, ensuring that our impact is increasingly felt across the continent.

1000
Members

We established new partnerships with various non-profit organizations, schools, government entities, and tech communities in the region. These alliances, such as Fundación Pescar, GDG Córdoba, and Orientar Educativa, strengthen our ability to deliver impactful programs and extend our reach within the tech ecosystem.

Alliances

Actions and Achievements

Jala University is a cutting-edge educational institution dedicated to training highly qualified engineers in the field of technology. The university currently offers specialized programs in software engineering, combining theory and practice to prepare students for the demands of today's job market.

Professional Development with Jala University

Equipping Emerging Engineers for Success

Through an agreement with Jala University, we offer high-level professional training opportunities by sponsoring scholarships for young talents. Our goal is to equip future engineers with the necessary skills and knowledge to excel in their careers and drive economic development in their regions and communities.

Impact: Our collaboration with Jala University helps bridge the gap between academic knowledge and real industry job requirements, fostering a new generation of skilled engineers ready to face the challenges of the tech sector.

GP4Tech is a community that aims to involve more women in the area of technology.

Their main path is through education, which is why they diligently seek ways to disseminate knowledge through informative talks, workshops, training sessions, and a variety of events and activities aimed at fostering women's inclusion.

These efforts not only provide them with the necessary visibility but also serve to instill hope and ambition in young individuals navigating the pivotal stage of career decision-making.

Their aspiration to effect positive change in the world is palpable, fueled by their abundant talent and unwavering optimism.

Preparing High School Students for the future

In collaboration with GP4Tech, we offer programs to prepare high school students for university-level technology courses. Our program includes:

	Mathematics	Covers essential math concepts, logical thinking, and problem-solving skills.
	Introduction to Computer Science	Develops problem-solving skills and programming fundamentals.

Supporting and promoting Techzone, a prestigious technology event for engineers in Latin America.

The event covers diverse topics, among them software development and AI, featuring expert speakers and interactive sessions.

More than 300 engineers from across Latin America attended the event.

Promoting and organizing events for tech organizations such as Angular Bolivia, Universidad Mayor de San Simón, and GDG (Google Developer Group).

By enhancing their visibility, we ensure their activities reach a wider audience, including supporting webinars, workshops, and conferences to foster a vibrant tech community.

Thank you for your trust and collaboration.

Together, we can achieve even
greater heights.
